

Product and Service Portfolio

Products & Solutions

We don't just offer you standard solutions; on the contrary, we develop a customised solution that is ideal for your logistical challenges. In the process we provide you with **individual elements of load carrier management** as well as **end-to-end solutions for the entire value chain** – from consultation to procurement, renting, financing, logistics, cleaning, account management and pooling right up to recycling. We attach great importance to fair and **cooperative partnership** and always strive to find the perfect solution for you and your company.

RECYCLING

Raw materials such as high-quality plastics are valuable. For this reason – and because we not only think in terms of profitability but also eco-friendliness – we focus on recycling of damaged load carriers. Thus, you don't have to take care of the disposal; we replace your defective load carriers and pay you the value of the raw materials.

REQUIREMENTS ANALYSIS

What challenges do you face? Do you require "plain old" standard load carriers or specific, individual products? How high is your demand – normally and during peak times? Do you require financing concepts? Would you like to reduce your administrative effort through fully automated pooling solutions? Whatever you need, we have an appropriate solution for every challenge – after all, we have been in this field for the last 20 years. Get in touch with us and we will be happy to advise you!

PROCUREMENT

You require load carriers and/or equipment at the right time and place? Then you've come to the right place! Whether you are considering buying or renting, you will benefit from our wholesale prices offered by certified manufacturers. Moreover, we are known for our reliable and timely deliveries even during peak seasons. We ensure this through our long-term partners, who comply with our quality standards regardless of whether they are new goods or second-hand.

ACCOUNT MANAGEMENT, POOLING

Just imagine: no managing your accounts, no preparing tedious individual statements, all available load carriers at a glance and therefore cost-effective logistics... We make this dream come true for you – either through fully automated processes using our in-house software poolbook, or manually. Poolbook can be connected to your ERP system easily and without hassle. In either case, you do not have to worry about anything; we take care of it with our pooling solution.

LOGISTICS, CLEANING, STORAGE

You focus on your core business, we will take care of your load carriers. Benefit from our Europe-wide network to transport your empties in a cost-effective manner. Don't struggle with certifications for perfect, food-grade load carriers – leave it all to us. Why block storage capacities when we can take over the storage management from you?

FINANCING, RENTAL

You wish to buy, rent, clean or pool load carriers? Together with our partners, we offer you appropriate financing concepts such as leasing or hire purchase. You can, of course, also rent a few standard products from us.

Load carrier portfolio

You are looking for **packaging, load carriers or logistics solutions** and we can offer them to you! We see ourselves as a **packaging specialist** and a strong partner at your side with more than 20 years of experience in **managing your load carriers**. Be it large load carriers, storage and transport containers, pallets or constructive packaging, we guarantee that we will find the right solution for any challenge you face!

Storage and transport containers

- Typical containers for the meat-processing and food industry
- Rigid containers
- Revolving/stack containers
- Folding and hinged containers
- Baskets, risers, crates
- Small load carriers

Pallets

Constructive packaging

- Material mix
- Complete packaging solutions
- Inner elements for boxes and containers
- Packaging concepts

Accessories

- Plastic meat hangers
- Tubular track & sliding hooks
- Inserts for H1 hygiene pallets
- Conveyor rollers

Every manufacturing operation requires packaging and associated services, e.g. financing, lease, logistics, cleaning or storage. It does not matter to us what products are transported, thanks to our many years of experience and excellent network, we can meet almost any needs. We also look ahead and are already addressing issues such as e-commerce, reusable packaging and online food and halal-conform packaging. Just contact us, we look forward to speaking with you!

Practical reasons to cooperate with vpool

Your needs are the focus of our efforts

Our unbeatable team ensures that we can supply you with load carriers reliably, quickly and flexibly even, and in particular, during peak times, but not just that: Our customers contributed to the basic structure of our pooling software poolbook that we developed in-house to ensure that all processes are perfectly aligned to your needs, to allow efficient and also environmentally-friendly cooperation.

We set high standards

We don't want to just supply you with load carriers, we want to offer you integrated solutions. Our made-to-measure solutions mean that you can concentrate on your core business and we will manage what we see as the greatest pastime in the world, namely the management of your load carriers.

We are innovative

We encourage our colleagues to think outside the box and come up with ideas relating to processes or the overall business development. This means that we are in a position to adapt ideally to the requirements of the market and our customers. We received the Top 100 Innovator Prize for Medium-Sized Companies for our innovative prowess in 2016.

We are sustainable

As a partner to the Centre for Sustainable Corporate Management (ZNU) of the University of Witten-Herdecke, we pursue clear goals to make the economic, social and environmental processes even more sustainable. In a first step, we are already moving toward becoming a paper-free organisation. To this end we have introduced a document management system that already saves us approx. 300 large files of paper in our internal processes every year! But we are not finished yet. By integrating our customers into our pooling software poolbook, we expect to make further significant savings, not just for ourselves but also for our customers.
